

Seminars

Animal Ecology, Morphology & Biodiversity

March 2009 – Kolenmuseum 00.04 @ 16h

Friday 6 MARCH

Metapopulation genetics and functional genomics of the Glanville fritillary butterfly *Melitaea cinxia*

Dr. Luisa Orsini (Lab Aquatic Ecology & Evolutionary Biology, KULeuven)

Friday 13 MARCH

Closed life support systems for space travelling: the human-bacterial cycle of MELiSSA

Dr. Ir. Natalie Leys (Research Unit for Microbiology, Belgian Nuclear Research Centre)

Friday 20 MARCH

To see in different seas: spatial variation in the rhodopsin gene of the sand goby

Drs Maarten Larmuseau (Lab of Animal Diversity & Systematics, KULeuven)

Thursday (!) 26 MARCH

Immunity is costly: What can parasites tell about competitiveness of their hosts?

Dr. Jörn Scharsack (Animal Evolutionary Ecology Group, University of Münster, Germany)

PhD course G0A78A

Friday 27 MARCH

Official opening “Zoological museum”
